How are “cookies” or “tracking technologies” used?

We (or service providers and marketing customers on our behalf) may use technologies, including “cookies,” “web beacons,” “tags” and “scripts” to automatically collect information from you when you use the Services. Cookies are small amounts of data that are stored within your Internet browser, which saves and recognizes your browsing habits. Web beacons are webpage elements that can recognize certain types of information on your computer or mobile device, such as the time and date you viewed a page, which emails are opened, which links are clicked, and similar information. A User’s web browser places cookies on the User’s hard drive for record-keeping purposes and sometimes to track information about the User. You may choose to set your web browser to refuse cookies, or to alert you when cookies are being sent. If you reject cookies, you may still use our Services, but your ability to use some features of our Services may be limited. Otherwise, by continuing to use our Site, you are accepting our use of these cookies that make advertising and communications more relevant to you and your interests, and further help us to improve our Services.

We partner with third parties to manage advertising on other websites, and these third parties may use technologies such as cookies to gather information about your activities using the Services and other sites in order to provide you advertising based upon your browsing activities and interests.

We may use the following types of cookies:

- **Essential cookies.** These are cookies that are required for the operation of our website. They include, for example, cookies that enable you to log into secure areas of our website, and to use online forms.
- **Functional cookies.** These are used to recognize you when you return to our website. This enables us to personalize our content for you, greet you by name and remember your preferences. These cookies also record your visit to our website, the pages you have visited and the links you have followed. We will use this information to make our website and communications more relevant to your interests.

- **Analytical cookies.** These cookies allow us to recognize and count the number of visitors and to see how visitors move around our website when they are using it. This helps us to improve the way our website works, for example, by ensuring that Users are finding what they are looking for easily.
- **Marketing/Targeting cookies.** One of our Services is to provide the Mench.ai technology. Also, ads appearing on our Site may be delivered to Users by advertising partners, who may set cookies. These cookies allow the ad server to recognize your computer each time it sends you an online advertisement to compile non-Personal Information about you or others who use your computer. This information allows ad networks to, among other things, deliver targeted advertisements that they believe will be of most interest to you. This Privacy Policy does not cover the use of cookies by any advertisers.

Conversion tags. We have integrated conversion tags on our Services. These tags use cookies which were placed on your device by the display advertising service provider. When a User clicks on an ad leading to our Services, a temporary cookie is placed on the User's device. When you complete a certain action on our Services, this cookie will be recognized and a conversion will be recorded. We do not have influence on which exact data will be collected by these cookies nor do we know the full extent of the data collection. The respective display advertising network provider is solely responsible for the data collection and use of such data.

Log files. We gather certain Personal Information automatically and store it in log files. This Personal Information may include IP addresses, browser type, device identifier, Internet service provider (ISP), referring/exit pages, operating system, date/time stamp, clickstream data, and other usage data. We may combine this automatically collected log information with other Personal Information we collect about you. If you reach out to us via email, telephone or facsimile, we may also log your emails and your telephony Personal Information, such as your phone number, forwarding calls, SMS routing information and types of calls.

We collect this Personal Information to, among other things, provide you information and benchmarking based upon your usage of the Services, which are used in analyzing trends, administering the Services, tracking Users' utilization and gathering information about our customer base as a whole. We may receive reports based on the use of these technologies by these companies on an individual as well as aggregated basis.

Mobile applications. We may automatically collect Personal Information about the devices using our Services, such as the type of device, the version of the operating system, and the device identifier (UDID). We use analytics to allow us to better understand how our mobile Services are used by our customers. We may record Personal Information such as how often the application is used, the events that occur within the application, aggregated usage, performance data, any exceptions and the source from which the application was downloaded.

Device information. When you use our Services, we collect information about the devices you are using to access our websites and our Services, including without limitation information about your computer, tablet, phone, stylus, pen, or other tools. We may collect the hardware model, operating system and version, unique device identifiers, and mobile network information.

Mench.ai technology. One feature of our Services is our Mench.ai technology that is placed on our website and the webpages of various third party websites. When our technology is placed on these third party websites, a User's browser may send us various usage information of that User, including, but not limited to, the User's IP address, device information, websites visited, browser type and operating system. We may share this information with advertisers and website publishers so that these third party websites can deliver advertisements, including advertisements tailored to visitors' interests. When visitors use these third party websites, they will be subject to privacy policies and terms of use of those third party websites.
